

LANCE KRYSTOFER A. GALICIA

Manila, Philippines • lance_galicia@dlsu.edu.ph • linkedin.com/in/lancegalicia • github.com/galiciary

Education

De La Salle University

Bachelor of Science in Computer Science

Manila, Philippines

August 2028

Relevant Coursework: Information Security; Computer Networks; Information Management; Computer Organization and Architecture; Intelligent Systems; Web Application Development; Data Structures and Algorithms

Certifications

ISC2 Certified in Cybersecurity (CC) Passer

International Information System Security Certification Consortium (ISC2)

Manila, Philippines

March 2026

Projects

Galicious Secret Scanner

Course Project, Advanced and Offensive Security

Python, Security, CLI

August 2026

- Built a scanner detecting credentials exposed in a local folder or GitHub repository, including secrets deleted from the working tree but still recoverable from git history
- Combined a regex signature library with a Shannon-entropy fallback for custom tokens, feeding one pipeline that deduplicates, scores and redacts every finding
- Scoped the tool to detection and reporting, ensuring no output in any format contains a full secret

Full Capacity: The Evolution of Computer Data Storage

Course Project, Introduction to Computer Organization and Architecture II

Astro, React, MDX

May – August 2026

- Built the NAND flash chapter of an interactive storage exhibit, comprising eleven React components that simulate floating-gate charge trapping, wear leveling, cell voltage distribution and SSD interface throughput
- Developed the exhibit's about page and layout, deployed to GitHub Pages

ResQ: Response and Emergency Support Queue

Course Project, Web Application Development

Node.js, Express, MongoDB, Handlebars

January – April 2026

- Built the Express backend for a disaster-response forum, covering authentication, posting, profile and saved-post routes over a MongoDB data layer
- Implemented session-based authentication and image upload handling, with seeding scripts to populate users and posts for development
- Structured the application around an MVC pattern with separate controllers, models and routes, deployed on Render

Experience

Daraga Municipal Hall, Employment Section

Clerical Intern

Daraga, Albay

April 2024 – May 2024

- Assisted in managing finances and logistics for a summer camp accommodating roughly 300 participants
- Contributed to budgeting and resource allocation, directing funds efficiently without compromising material quality
- Proposed and developed an online adaptation of the internship application by integrating the official PESO website with Google Sheets, improving the department's data management

Leadership & Activities

DLSU Data Science Society

Associate, Data and Research

Manila, Philippines

September 2025 – August 2026

- Wrote research-backed articles on emerging technologies for the organization's publications, translating current developments for a student audience
- Built the data cleaning pipeline and Dashboard Overview page for the organization's internal analytics dashboard, reporting membership, attendance and satisfaction

Associate, External Relations

September 2024 – August 2025

- Sourced speakers and partners for data science seminars, expanding the organization's reach among technology professionals

La Salle Computer Society

Manila, Philippines

Junior Officer, Research and Development

May 2026 – August 2026

- Built GET /api/audit/status/:job_id for Check Republic (TypeScript/Express/Supabase), an automated compliance auditor for student-org documents
- Translated async job states into 404/202/500/200 responses, covered by Jest integration tests

Skills & Interests

Technical: Python, Java, C, R, TypeScript, SQL, x86-64 Assembly; React, Astro, Node.js, Express, Streamlit, pandas, NumPy; MySQL, MongoDB, Supabase; Git

Languages: Fluent in English, Filipino, and Bikolano

Interests: Strength training, literature, films and series
